PROTO Click

PID: MIKROE-1507

PROTO Click is an accessory Click board[™] used as a construction base for prototyping electronics in mikroBUS[™] form factor. It features a 10x11 prototyping area and additional power pads providing an easy and elegant solution for adding the external connection capability to the Click board[™], plugged on a mikroBUS[™] socket. This Click board[™] represents a cheap and effective solution for creating a board that suits your project needs.

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

ISO 27001: 2013 certification of informational security management system. ISO 14001: 2015 certification of environmental management system. OHSAS 18001: 2008 certification of occupational health and safety management system.

ISO 9001: 2015 certification of quality management system (QMS).

Specifications

Туре	Proto
Applications	Can be used to assemble custom electronics thus creating a custom Click board™
On-board modules	No modules only 10x11 proto PCB area
Key Features	Easy and elegant solution for adding the external connection capability to the Click board™
Interface	Analog, GPIO, I2C, PWM, SPI
Compatibility	mikroBUS
Click board size	L (57.15 x 25.4 mm)
Input Voltage	3.3V,5V
